

Engine Compartment Cleaner

Description

Special cleaner for engine and engine compartment. Its selected combination of active agents including washing and cleaning agent additives dissolves oil and grease residues easily as it does tar, brake dust and other contaminants.

Properties

- releases dirt, oil and grease residues
- does not attack plastics, rubber and paints
- fast acting
- removes preservatives
- high washing and cleaning efficiency

Technical data

Form	liquid, aerosol
Color / appearance	colourless
Base	surfactants and solvents
Propellant	propane, butane
Odor	characteristic
Flash point	n.a.

Areas of application

For cleaning engines and engine compartments.

Application

Spray the parts to be cleaned from a distance of approx. 20 – 30 cm and allow product to take effect for approx. 10 – 20 minutes, depending on the degree of contamination. Afterwards, thoroughly rinse off with a strong stream of water. Use LIQUI MOLY Motor Conserve to preserve the cleaned parts. Can also be used to remove Wax Coating from LIQUI MOLY.

Note: when using Engine Compartment Cleaner on repainted parts or with air brush check for compatibility by applying first to a concealed area. When cleaning, the local regulations of the water management authority must be followed.
